

## WATER SYSTEM OPERATOR I

Denver Water is recruiting for a Water System Operator I to assist in controlling the flow of treated water into and throughout the distribution. Position must work shifts, weekends and holidays as directed.

Minimum requirements include graduation from high school or GED. Three years' experience related to distribution system operation, including instrumentation and controls, and load control computer systems is required. Successful candidate must attain a Class II Colorado Water Distribution Operator Certification within two testing cycles from the date of appointment.

Hiring salary range is \$16.58 - \$19.19 per hour DOQ. Candidates must submit a Denver Water application and a current MOTOR VEHICLE record to be considered for this position. Applications can be located on our web site at ([www.denverwater.org](http://www.denverwater.org)) or at the Denver water Career Enrichment Center. Resumes will not be accepted in lieu of applications. Please apply at the following address.
